

Weber Kuhn Tribune

Celebrating the family of Harry and Tillie (Kuhn) Weber

Indianapolis, Indiana

Volume 7 – August, 2017

Are There Weber Cousins Next Door?

Think about the large family of cousins that you have merely from the brothers and sisters of Harry Lawrence Weber. There were 12 children in his family growing up in Harry and Mary (Keen) Weber's home on South Alabama Street in Indianapolis in the early 1900s.

As time goes by, we have a tendency to lose sight of the many people carrying similar genes to us. We might be living down the street from a cousin and haven't identified them.

Following are the children of Harry and Mary Weber and their spouses.

Harry Lawrence Weber and Otilia "Tillie" Kuhn

Ida Theodora Weber and Frank S. Cordell

Walter Maximillian Weber

Mary Stella Weber and John "Jack" E. Lieland

Elizabeth "Lillian" Weber and Harry B. Keller

Edith Marie Weber and Edward Ditlinger

Clarence George Weber

William John Weber and Elizabeth Carpenter

Herbert Lawrence Weber and Kathleen
Langdon and Alice High

Albert Edward Weber (died as baby)

Catherine Amelia Weber and Frank Salmon

Alberta Clara Weber and Carroll S. DeJong

There were 21 grandchildren as a result of the unions listed above. Do any of these names remind you of someone you've crossed paths with and didn't recognize as family? You can find a list of those 21 descendants in our Weber Family History binder. Could some of our kin, living or dead, be lurking in front of our noses?

Family History Corner

One enjoyable part of our reunions is browsing through photos from our closets and attics that cousins bring for sharing. As I was having some fun last year looking through Uncle Bob's albums I snapped some photos with my cell phone. But I failed to write down any information about them. Help me out! Can you identify the activities, dates, people or places in these two historical photos?
